

SPECIAL CONDITIONS

These conditions amplify and supplement, if necessary, the General Conditions governing the contract. Unless the Special Conditions provide otherwise, those General Conditions remain fully applicable. The numbering of the Articles of the Special Conditions is not consecutive but follows the numbering of the Articles of the General Conditions. In exceptional cases, and with the authorisation of the competent Commission departments, other clauses may be introduced to cover specific situations.

To be filled accordingly to needs of each type of Supply

Training programs:

By the equipment suppliers under supervision of technical team of the project at each site of selected project areas.

The training program will include the following subjects:

- General rules of preventative maintenance
- Daily Maintenance
- Monthly Maintenance
- Yearly Maintenance
- Storage Maintenance
- Operation and maintenance safety

Warranty

Minimum one year from the date of machine operation or 1000 working hours.

Manuals and Catalogues

Manuals and Catalogs the Bidder, if contracted, shall provide all operation and maintenance manuals complete with drawings, literatures and spare parts catalogs that assist in proper operation, maintenance and repair work.

Source, Origin and Nationality Requirements

Bidders must comply with EU Acquisition Regulations regarding source, origin and nationality, as well as Egyptian Laws. Bidders must clearly state the source and origin of all commodities.

Spare Parts and Consumables

Bidders must submit an itemized price list of recommended spare parts, and consumables which are required for one – year of operation. Prices must be fixed for one year after final turnover of the unit. **In no event does this constitute an obligation to buy the full or part of the list.**

Training

- Bidders shall propose and provide, if contracted, class room and on the job training (OJT) for one engineer and four technicians/ drivers (one for each unit) and two mechanics for maintenance. Trainees will be selected and approved by the project in collaboration with the successful Bidder (the contractor). The training program shall include, among other subjects, the following:
- Basic knowledge of the equipment system and components
- Proper operation, procedures and safety operation
- Control and implementing and using
- Regular small scale maintenance
- Basic preventive maintenance and repairs of all components and equipment
- Warranty coverage

The training program and the training material must be submitted to the project office one week before the training schedule for review and approval or requesting changes or additional information. The contractor will provide to the trainees adequate and complete handouts.

Terms of Payment

The Bidder will include in the Bid the terms of payment. The project has the right to accept or negotiate these terms with the Bidder.

Warranty

In addition to providing liability provisions in accordance with GOE regulations, the awarded Bidder will provide a warranty that the equipment will be in strict conformity with the Contract, and will show no defect due to faulty design, material and/or workmanship for a period of not less than 12 months, from the date of commissioning. The successful Bidder will be required to repair or replace any component or part/s thereof which may show any defect during the warranty period at the Bidder's expense. The warranty period shall be extended with the period equal to the time the component was out of operation due to the defect. In addition to this, the contractor shall compensate the consumed parts and consumables beyond the rates as specified in the Bid and Contract. Compensation shall be based on year of operation. This warranty shall be in favor of the end user identified by the project. The Program reserves the right to request the successful Bidder to extend the performance guarantee to cover the warranty period.

Inspection and Testing

The project reserves the right to inspect the facility and components upon delivery of equipment. The successful Bidder must inform the project with the schedule of shipping and handling when the equipment are ready for inspection. The Bidder will include in the Bid all testing procedures. The tests shall include, among others, the engine, transmission, tires, hydraulic system, steering system, and all other essential parts needed to be inspected. The vendor will be required to provide the equipment, devices, and tools needed for the inspection and testing. The vendor will also provide guidance and expertise for the turnover
